

Mubuga Coffee Ltd

Mubuga coffee Ltd is a private company that was founded in 2015 in Western province, Karongi District and the washing station has the capacity of producing 1000 tons of cherries equivalent to 6.5 containers, screen 15+ ready for export.

“At Mubuga coffee, we are driven by the passion for the highest quality arabica coffee in several types of processing; either fully washed or natural coffees with bright malic acidity and Cocoa flavors, cupping at 87+ score,” says Mr. Mathias Abimana, the owner of Mubuga Coffee Ltd.

These unique qualities are grown at an altitude of 1,788-1980 meters; with volcanic loam soils and a cool tropical climate on a vast land of Mubuga’s model farm of 27,000 coffee trees. Mubuga Coffee is also a source from 10,000 coffee farmers surrounding the washing station grouped into 5 cooperatives.

To contribute to their social-economic development, Mubuga coffee provides finances to the farms to pay health insurance and buy seeds for their food crops.

“Every day we are driven by the need for the farmers to improve the coffee quality to ensure they receive the best price. And, of course for our customers – ensuring they receive not only the best Rwandan coffee but the best customer service experience,” says Mr Abimana

Mission:

To achieve high quantity and quality coffees that meet the international market standards.

Vision:

To not only grow as a company but as a community. Whatever benefits we may reap must be reflected in the community as well.

Help us to grow the sustainable specialty coffee industry in this beautiful country. Every purchase of Mubuga coffee allows us to train more of our farmers in sustainable coffee farming, ensuring that generation restoration is embedded in everything we do from seed to cup.
